**Notes:**

New naming method adopted 2007-11-02. City of licence comes first - followed by supplementary name (s) that matches Ident. Example: YDB Burwash-Destruction Bay. Actual NDB names not used because many beacon names, especially LOM marker beacons, do not match the ident letters or even use 5-letter contractions that are not real place names. Example: ME Chicago-Medinah - rather than Deana.

Beacon emphasis used to correlate with stronger beacons most likely to be received.

A = Airport
